

Owl Class Home Learning (2)

Maths

Year 2s should know 2, 5, 10, and 3 times tables and Year 3s 4, 6 and 8 times tables. Everyone needs to practise telling the time using analogue (traditional clock face) and digital clocks.

I will allocate some of the summer term Active Learn maths games to you.

Write directions from one room to another room. Can you describe the number of steps and turns (quarter, half or three-quarter turns, clockwise or anticlockwise) Can someone follow your instructions like a robot?

What 2D and 3D shapes can you find in your house? Name them and describe them using mathematical language: faces, vertices and edges, parallel lines, right angles.

The Hamilton daily maths lessons are thorough.

English

Hamilton daily English lessons are really good.

Try some of these ideas to practise your spellings: write word several times using different colour pens; write them on cards and play snap or pairs; use in sentences, poems or stories. Write words in sand, with a watering can or model them with plasticine. Break word into parts, use a funny voice, think of a mnemonic for tricky words e.g. because = **big elephants can always understand small elephants**.

Write a story about a child stuck at home for weeks. Describe how they miss their friends and their normal activities. What adventures could they have?

Imagine you are a red kite flying over Oxford during Spring 2020. What do you notice has changed below you? Describe what you can see and hear.

If you have a copy of Alice In Wonderland – write about your favourite characters. Rewrite your favourite scene in your own words. Imagine you suddenly shrink in size. Explore your home and write how you would move around it and what might happen to you.

Keep reading and write a review of some of the books you have read.

Tell stories and write your own version of them.

Write a letter to an elderly relative.

Science

Plants - any gardening and watching how plants change will be helpful. Measure them with a ruler, draw them, and take photos.

Do some of the thought-provoking STEM starter ideas.

Art

You could draw a self portrait every day. How different can they be? Change the art materials: pencil, biro, felt tip, paint, collage, etc Change the size, style, colours, etc Change yourself - wear different clothes and wear disguises.

Online ideas: National Galleries of Scotland will send you an email each Monday with Our Creative Curriculum – first 3 weeks have been really good fun.
